LIVING GARDEN FLORIST

FLORAL SHOP

Designing a florist shop involves creating a space that is not only visually appealing but also functional for floral arrangements and customer interactions. It has an open and airy layout that allows customers to move freely and explore the floral offerings.

Embrace sustainable design by using eco-friendly materials, recycling waste, and offering biodegradable packaging options.

Natural elements are integrated into the design, such as wooden shelving or living green walls and adding potted plants or flowers to enhance the overall ambiance of the space.

A combination of natural and artificial lighting are use to showcase the colors and textures of the flowers. Pendant lights, track lights or spotlights are installed to highlight specific displays or arrangements.

POP UP STYLE

Incorporate fresh flowers and arrangements strategically throughout the space. Use a variety of flowers, colors, and textures to add visual interest. Choose stylish vases and containers that complement the overall design. Experiment with different shapes, sizes, and materials for a diverse look. Also Create a striking visual impact with cascading plants or an array of mounted containers.

OVERALL

Floral interior design adds a touch of nature and elegance to indoor spaces, fostering a connection with the outdoors and contributing to a positive, uplifting environment. Whether used in residential, commercial, or hospitality settings, thoughtful incorporation of flowers and greenery can significantly enhance the overall ambiance of a space.
